

Insights Report

How many records are there in the database?

The database contains 8807 records.

Assumption: None.

Reasoning for suggested chart type: A simple bar chart can visually represent the total number of records in the database effectively.

Insights Report

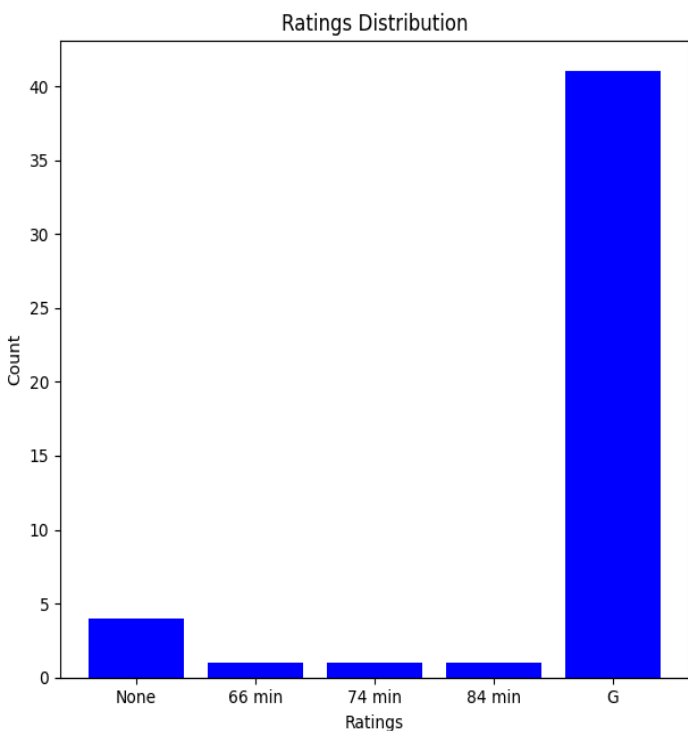

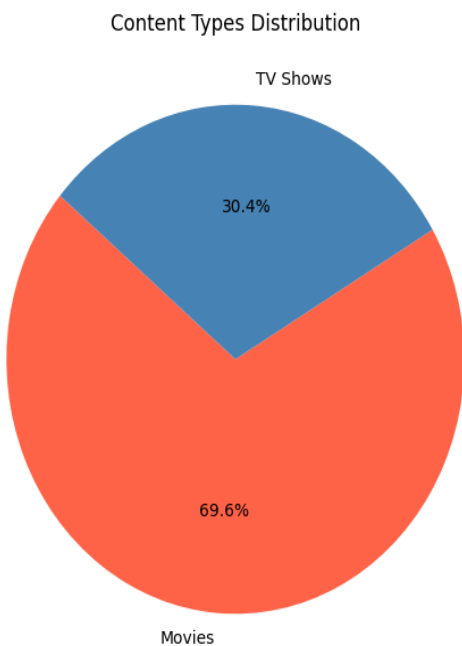

What is the distribution of content types (Movies vs. TV Shows) in the database? What are the differences in ratings between the two?

The database contains 6131 Movies and 2676 TV Shows. Various ratings are available, with 'G' being the most common.

Assumption: None.

Reasoning for suggested chart type: A pie chart can effectively show the distribution of content types (Movies vs. TV Shows) in the database.

A bar chart can display the counts of different ratings clearly.

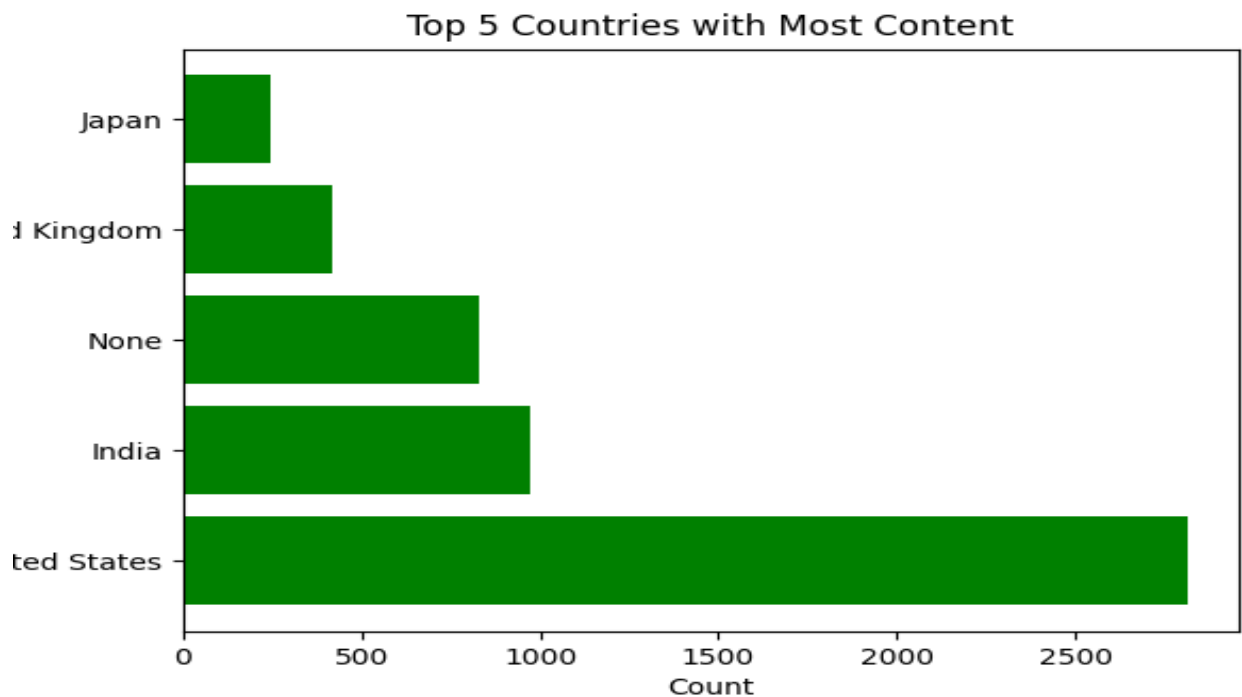

Insights Report

What are the top 5 countries with the most content in the database?

The top 5 countries with the most content in the database are the United States, India, None, United Kingdom, and Japan.

Assumption: None.

Reasoning for suggested chart type: A horizontal bar chart can effectively compare the content counts of different countries.
